

Quartermile

Project Details

Location: Edinburgh

Products: Feature Beam and Copings

Finishes: N/A

Quartermile is a development in the heart of Edinburgh, located on the site of the former Victorian Royal Infirmary. Metalline have been involved with the Quartermile project from its very beginning, producing high-quality aluminium fabrications from building to building. The project is due to finish in 2019, and Metalline are continuously providing a variety of products for the remainder of the development's lifespan. Quartermile is a development in the heart of Edinburgh, located on the site of the former Victorian Royal Infirmary. Neighbouring the University of Edinburgh and famous Meadows Park, Quartermile is one of the most sought-after pieces of land in the Scottish capital. Development over the last 10 years has seen the UNESCO world heritage site transformed into an iconic piece of Edinburgh architecture.
